Sarah Skillen
A **Software Engineer** who
enjoys debugging, design, and testing. A strong team player who can quickly learn and apply new technologies to organizations by collaborating and optimizing processes. Able to think fast to come up with a solution to solve any issue encountered. Learning is the key to life.

TECH SKILLS

Languages	Frameworks	Database
JavaScript	React	PostgreSQL
HTML	Redux	Azura Data Studio
CSS	Node	
PYTHON	Express	
Vue		
SCS		

Deployment
Heroku
GitHub pages
Pixal

Testing
Jest
QUnit

EDUCATION

Alchemy Code lab
Diploma | SEPT 2020 - MAR 2021
An intensive remote program diving into full stack JavaScript applications .

Career Institute Tennessee
Cosmetology | JUNE 2007 - JUNE 2008
Certificated and licensed in cosmetology

PROJECTS

Oregon Trail
JavaScript|HTML|CSS   GIT   DEPLOYED
This was a fun and fantastic remake of the classic Oregon Trail in Vanilla JavaScript.
This was performed working remotely in a one-week sprint. My main contribution was creating a health function that added and subtracted depending on the user's chosen path—leveraged higher-order components to maximize component reusability.

Karaoke Roulette
Node|Express|SQL| JavaScript   GIT   DEPLOYED
Have fun while also being able to social distance with our karaoke app.
During this remote sprint, my main contribution was pulling the team together and guiding the developers to work in teams. I also worked in the back end of the app ending up in the front end helping to create a wonderful app. Then a teammate and I pair-programmed an API for storing data from a scraped file and created a matching algorithm to connect our data structure to a third-party API.

PROFESSIONAL HISTORY

Full Stack Software Engineer
// March 2022 - PRESENT
Append Media Llc // 2022
Responsible for finishing tasks/features every day as well as closing out stories (the completed new feature) and at the end making the styles uniform and consistent by creating a finished user-friendly product. I focused a lot of time refactoring older legacy code as well as broken code. Help to explain to other developers the new changes as well as show them how to implement them into their own tasks to make the code more readable. Having daily stand-ups to go over what we plan on doing that day as well as having specific teamwork tasks to help us collaborate on the problem. Help set the scope to new tasks to determine how long a particular task and story will take a developer/team. Implement autosave to every project. At the end of the project and or finish of a new completed feature, I would be at the demo presentation to explain the new feature as well as take feedback on any changes the partner would like to add or change. With this position, I learned so much and gained new experiences/technologies in building a full-stack application.

Alchemy Code Lab // 2022
Software Engineer Lead Teacher Assistant
//OCT 2021 - March 2022
Responsible for planning and implementation of materials for the new teacher assistants. Provided remote instructional support and mentorship for students learning complex JavaScript concepts, including debugging, analyzing code, critical and constructive feedback, and PR reviews. Planned and hosted an inner Alchemy Hackathon for all students who had different skill levels for a week-long sprint creating a Monster theme application. Maintain and or make the learning material for the students to complete
// SEPT 2021

Jack of all trades. Mentor and assist students who are learning complex JavaScript remotely. Grade and assist new students at the beginning of the program and updating markdown files on how to set up your os system to make it more understandable for the beginner.

Software Engineer Student Teacher
// MAR 2021 - SEPT 2021
Mentor and assist students remotely who are learning complex concepts in Javascript, React, Node, and PostgreSQL, completing daily PR reviews and assisting with debugging and clarification.

Sport Clip // 2012-2020
Lead Stylist // OCT 2018 - OCT 2020
Focused on training new hires to fulfill positions with a qualified knowledge of how to treat every customer while adhering to the rules and procedures of the company. In this position, I had to think on my feet and find solutions that worked best for both for everyone.

Stylist // OCT 2012 - OCT 2018
Leaned into team collaboration and communication to offer clients the best service.
